DATA, SYSTEMS, BUSINESS ANALYSIS

Transforming raw data into meaningful, useable information to support decision-making and problem-solving, with the end goal of reducing costs, increasing earnings, and growing the customer base

Education

BS in Information Technology

04/2023

University of the Potomac, Chicago, Illinois

- **Primary coursework:** Foundations of Business, Strategic Management and Planning, Project Management, Principles of Financial Accounting, Research and Statistical Analysis, Systems Analysis and Design, Computer Organization and Architecture, Database Management.
- **Special interests:** large scale data quality control; visualizations including summaries, graphs, and dashboards; building complex data sets; auditing and suggesting improvements to business metrics.
- **Skills:** Microsoft office, Microsoft Excel Pivot Tables, Java, Python, C++, SQL, HTML, HTML5, CSS, AWS, Linux, JIRA, Selenium, Tableau, Power BI.

Related Experience

Personal Data Scraping Project

01/2022

Chicago, Illinois

- Aggregated, cleansed, and combined data from more than 10 public data sources to create a Tableau dashboard showing US inflation rates over the past 3 years.

Data Analyst Intern

05/2021 – 06/2021

VNVK, LLC, Chicago, Illinois

Commercial laundromat for 5- and 7-star hotels in Chicago (www.windycitylaundry.com)

- Acquired data from primary and secondary data sources, and from those populated and maintained a database and a related business data system.
- Reduced expenditures by 35% on chemical purchases by eliminating data input redundancies, by streamlining applicable quantitative and qualitative analysis efforts, and by aligning short-term and long-term program goals and expenditure milestones.
- Increased business performance by 10% by assigning numerical values to essential business functions, making data more accessible and easier to understand, and rearranging and aligning program action dates.

Data Management Project

01/2021 – 02/2021

University of the Potomac, Chicago, Illinois

“Real-world” department project assigned by class professor, in lieu of generic class project.

- Created and managed a database for tracking monthly department expenses using MS Access, reduced time required by department staff to track expenditures by some 70%.
- Leveraged MS Access features such as Entity, Relationship Diagram, Reporting, and also utilized data from the Internet.
- Wrote multiple queries using a generic query grid to analyze relevant data and create reports.
